

# Product Management

All of our product labels includes 2D barcodes, which includes all the product descriptions.

- All smartphones or 2D barcode readers can recognize 2D (Datamatrix) barcodes.

- You can send the contents of the barcode directly to us.
- All the information we need is already encoded into the barcode, so we will not ask for extra information.
- With this system, you can easily send orders or ask for quotations in a short time without any confusion or misunderstandings.

- Our barcode system can also be used for stock management.
- All the products are labeled one by one, therefore stock errors are also avoided.

Our barcodes can be decoded by using smartphones, 2D barcode readers, tablet pcs. If your device does not have a suitable software, we can recommend a free software, which can be downloaded from this link; <http://www.i-nigma.com/Downloadi-nigmaReader.html>

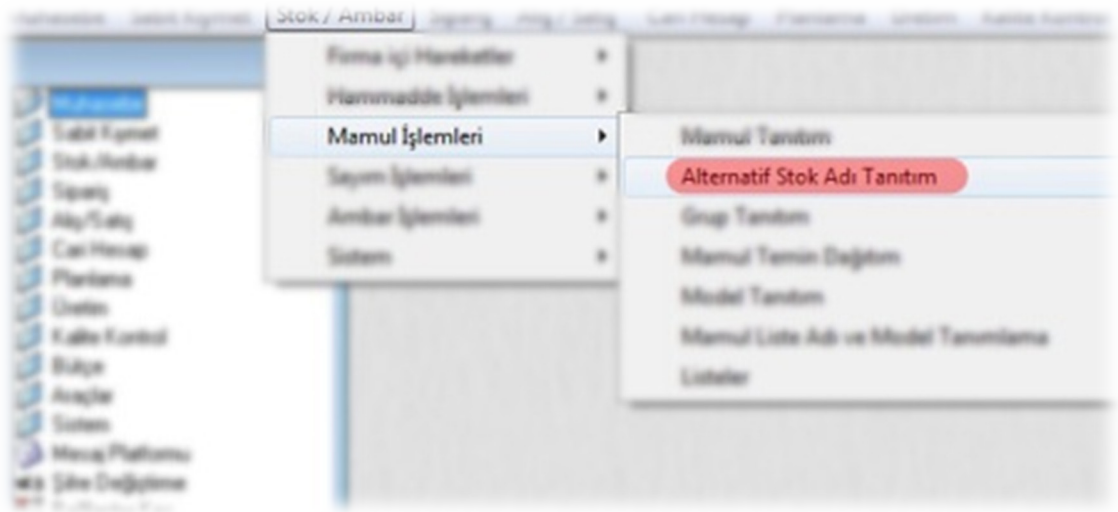

# Product Management

*Now, giving orders are easier than before...*

- Many companies are using their own product codes for ordering or asking for a quotation.
- This can create confusions from time to time, one company' product description or code may not be recognized by an another company.

Therefore...

- We also keep your own product codes and descriptions.
- With mating your and our product codes, you can give orders any way you want without confusion. Therefore misunderstandings can also be avoided.
- According to your request, we can also add your product codes to our product labels, which can be also very useful for your internal use.

# Product Management

*Steps after the ordering are also very easy...*

- You can check your order status from our website (7/24) anytime from anywhere you want. Therefore, you don't have to contact us.
